

1. [**&**, **const**, **<<**] are not allowed in class symbols in Visual Paradigm).

e.g.

```

matrix(const matrix &v)
double get_value(const int m, const int n) const
friend ostream & operator << (ostream &out, const matrix &m);

```

2. **overloaded operators** in matrix class are not included.

For exact function signature, see header files.
